

Fluxaf Brush Cleaner

Fluxaf Brush Cleaner is the ideal solution for cleaning paintbrushes, rollers, and other applicators after using paint, varnish, oil, or other coatings. This product quickly removes paint residues and ensures that brushes are restored to optimal condition for reuse. The powerful formula is suitable for both water-based and solvent-based paints, and protects the bristles, extending the lifespan of your tools. Fluxaf Brush Cleaner is quick to use and leaves no harmful residues behind.

Instructions:

1. Use the product in a well-ventilated area to avoid inhaling fumes.
2. If necessary, wear gloves to protect your skin from direct contact with the cleaner.
3. Pour the Fluxaf Brush Cleaner into a container or bucket, or apply the cleaner directly to the brush or roller.
4. Immerse the brush or roller into the cleaner or pour a small amount of the product directly onto the bristles of the brush.
5. Gently rub the bristles of the brush or roller against the sides of the container or bucket to loosen the paint or coating. For stubborn residues, you can let the brush soak briefly in the cleaner for a deeper clean.
6. Use a cloth or paper towels to wipe away excess cleaner and paint from the brush.
7. After cleaning, rinse the brush or roller thoroughly with clean water (for water-based paint) or with the appropriate solvent (for solvent-based paint). This ensures the cleaner is completely removed, and the bristles are thoroughly cleaned.
8. Place the brush or roller in a clean, dry area to dry. Ensure the bristles dry properly to keep the brushes in optimal condition for the next use.
9. If paint residue remains after the first cleaning, repeat the process until the brush is completely clean.

Attention! Always do a test area first to see if you get the desired finish. Results can differ per wood or surface type.

Cleaning:

Clean tools with water.

Available quantities:

500 ml.

Shelf life:

Store the product in its original packaging in a cool, dry place. Make sure the bottle is tightly closed to prevent evaporation or contamination. Keep out of reach of children.

Safety advice:

For extensive safety information, consult the MSDS.
