

Fluxaf Rust Stain Remover

Fluxaf Rust Stain Remover is a specially developed formula that effectively removes rust stains from various surfaces such as tile floors, stone, plastic, and metals. Rust stains can be a challenge to remove, but the powerful action of this product makes even the toughest stains easy to remove. Fluxaf Rust Stain Remover is safe to use and prevents damage to the treated materials, making it a reliable solution for both indoor and outdoor applications.

Applicable on:

- Tile floors
- Stone
- Plastic
- Metals

Instructions:

1. Ensure that the surface you are working on is clean and dry. Remove any loose dirt or dust from the surface before applying the product.
2. Apply a generous amount of Fluxaf Rust Stain Remover directly onto the rust stains. This can be done directly from the bottle or with a cloth/sponge.
3. Let the Fluxaf Rust Stain Remover sit for a few minutes to loosen the rust. This will make it easier to remove the stains without damaging the surface.
4. Use a soft cloth or sponge to gently remove the rust stains from the surface. Be sure to avoid using abrasive materials to prevent damage to the surface.
5. For larger surfaces or if a lot of cleaner has been used, you can wipe the surface with a clean, damp cloth to remove any excess product.
6. Allow the surface to dry properly and inspect it after drying to ensure that all rust stains have been removed. If necessary, repeat the treatment for stubborn stains.

Attention! Always do a test area first to see if you get the desired finish. Results can differ per wood or surface type.

Cleaning:

Clean tools with water.

Available quantities:

500 ml.

Shelf life:

Store the product in its original packaging in a cool, dry place. Make sure the bottle is tightly closed to prevent evaporation or contamination. Keep out of reach of children.

Safety advice:

For extensive safety information, consult the MSDS.
